No. 14

12th October 2011

Last Week's Proceedings – 28th September, 2011

Pres. Eric welcomed everyone to our 13th meeting of this year. PP Uncle John introduced his guest PP Martin Putz and his wife Natascha Putz, from RC Bad-Bergfabern, Germany. Pres. Eric then welcomed back PP Henry Chan and Dir. Kevin.

Pres. Eric introduced the birthday boy, and he is our IT Chair Anthony Kwong who has chosen Rtn. Dr. Tony Loy to be his birthday song leader. Then Rtn. Dr. Tony Loy led the song and all members raised their voice and sang together celebrating with Anthony; Pres. Eric then presented the birthday gift to him.

Afterwards, Sergeant-at-arms William Leung reported the red box of today is HK\$ 1,400. Also, SAA William reported the Sponsors of Service Project are: HK\$ 10,000 by MC William Wong, and HK\$ 10,000 by Rtn. Jonah Cheung.

Then, Pres. Eric invited PDG Uncle Peter to pin our Paul Harris Fellows and they are:

Pres. Eric (PHF + 3)
PE Nancy PHF
HS Jonathan PHF

After the pinning of PHF, Pres. Eric made his announcements as follows:

Nomination of club member PP Stephen Liu to serve on the Task Force to consider the future of RIC premises ("Task Force"). We are only sending a representative to sit in the committee. The representative from HKIE can bring back the information relating to this Rotary premises search project to the board. Should there be any decision to be made our rep. needs to report back to the board for the decision.

Last Week Events:

Sept 23 – Visited PP Tajwar's Greenkey Technology learning his entrepreneur journey which was inspiring. 11 members attended. Thanks for his hosting a dinner for all members afterwards.

Sept 24 – Visited WEEE Eco Garden and learnt how the appliance were repaired and recycled. 15 members and families attended.

THE ROTARY CLUB OF HONG KONG ISLAND EAST LTD.

香港東區扶輪社週報

Club 16340

District 3450

**Chartered on 06 April, 1954 by Charter President
PDG (Uncle) John Yuen**

1. Club Program in October:

- 1.1 No Meeting next Wed Oct 5 because of the Chung Yeung Festival.
- 1.2 Uncle Peter Golf Cup trophy presentation will be held on Oct 12, 2011
- 1.3 Oct 12, 2011 Following the visit of WEEE Garden, ONE MEMBER ONE UNUSED/DAMAGED SMALL ELECTRICAL APPLIANCE DONATION DAY, PIC William reported and appealed members to bring ONE Small damaged appliance. We shall donate the collected items to St. James Settlement center after the meeting for the collection by Eco WEEE Garden and the subsequent delivery of the repaired electrical appliance to the deprived families and elderly.
Sponsor: PP Uncle John, PIC William Wong
- 1.4 Oct 26 Wed 7 pm, Race Course Fellowship Dinner, HK\$ 560, Target : 30 persons.
PIC Kevin
- 1.5 October 29 Choi Jun Inter School Swimming Gala, 5 Special Education Schools and One Secondary School in Ma On Shan Public Swimming Pool from 9 am – 1pm.. DG David will arrive at 11:30 am,
Sponsor: MC William Wong and Rtn. Jonah Cheung, PIC William Wong

November

- 1.6 Signature Eco Project: Plant 100 Trees in Fanling on Nov 13, 2011 9am -1 pm. 100 Participants. All members please join. Sponsor Pres. Eric, PIC William Leung

2. District Events:

- 2.1.1 Oct 25 2011 Tue District Vocational Luncheon, RC Holiday Golden Mile
- 2.1.2 Oct 28 2011 Fri District Vocational Award Evening , RC of Peninsula
Speaker: Police Commissioner: Tsang Wai Hung. Members please enroll to HS Jonathan.
- 2.2 Oct 29, 2011 Rotarian and Rotaractor Singing Competition, Enroll to HS Jonathan
- 2.3 Oct 30 10 K Race Tai Mei Tuk, PIC PP Norman, Deadline Sept 30, 2011, Runner enrolled: PP Norman, Pres. Eric, Freddie Wu, Stacy Ho, Henry Cheung. Late enrollment by Oct 8 to PP Norman and HS Jonathan
- 2.4 Nov 1 2011 11:15 till late PM District Golf Tournament 2011-The Sir Kenneth Fung Trophy, Shek O Golf Cup, HK\$ 1800 pay on the day, Poolside Dinner HK\$ 350. Enrol to HS Jonathan.
- 2.5 Nov 5 – 8, Visit to North Korea led by DG David, visit Orphanage, Home for the Disabled, Kaeson Youth Park, Pyongyang Red Cross, Sightseeing. Details will be announced.
- 2.6 Nov 23, 2011 (Fri) District Wine tasting and auction. 52/F Two IFC, 19:00 – 23:00. We are one of the host clubs committed 10 members and guests. Next OC meeting will be Oct 18 2011 Tue 7:30 pm
- 2.7 RI Convention May 6 – 9, 2012 enrolled to IPP Heman and AG Andy for hotel reservation. Member must enroll online in RI web site too.

Invitation:

- 3.1 Oct 8 Sat. Charter Ceremony of Rotaract Club of the Open University of Hong Kong by Rotary Club of Metropolitan Hong Kong
Venue : Bank of China Lecture Theatre in the Open University of Hong Kong at 30 Shepherd Street, Ho Man Tin. Registration and reception with refreshments will commence at 1 p.m. while the Ceremony will start at 2 p.m. and finish at around 4 p.m. A nominal charge of HK\$50 will be charged for Rotaractor, and HK\$100 for Rotarian and other participant. Enrol to HS Jonathan by Oct 5

3.2 Nov 11-12, 2011, DG Taikan Okabe, RI District 2660 Governor, invited RC HKIE members to join their Reception in Sheraton Miyako Hotel Osaka on Friday, Nov 11 and District Conference in NHK Osaka Hall on Nov 12 Saturday in Osaka, Japan

President Eric then introduced our today's speaker PE Nancy to report the First Club Assembly of rotary year 2011-12. Our members and guests listened attentively to the details of the reported activities and achievements of our Club accomplished during the past few months and they are highlighted as follows:

Community Service Project held successfully - Forty volunteers included Rotarians from the club, Rotaractors, friends and families have joined the Mid Autumn Festival Home Visit of Elderly Singleton, 中秋顯愛心 on 10th September, 2011. Apart from visiting and talking with the elderly singleton families living in Tai Hang Sai Estate, Tai Hang Tung Estate and Nam Sham Estate of Shek Kip Mei area we have presented gift packages to them which included moon-cakes, oranges, packs of rice, bottles of soy sauce and bottles of cooking oil. Rotarian William Wong has also provided mini moon-cakes additional to the package.

Social Networking Group created - Our Club has started a Facebook Group in June and now there are nineteen fans in the group. This group covers all of the events and activities of the club which attracts members and non-members of our activities. The group is not a substitute of the existing club website but a complement and an extra channel. We all look forward to see its growth in coming months.

For vocational and fellowship activities we have arranged the following events:

- Vocational visit to "WEEE Go Green" in Eco Park in Tuen Mun on 24th Sept - Three Generations of 14 members and guests have participated in this event.
- Uncle Peter Golf Club Tournament on 9th Sept - 26 members and guests participated in this event.
- Visited PP Tajwar's Greenkey Technology on 23rd September for learning his entrepreneur journey which was inspiring. 11 of our members have attended and were treated a nice dinner by PP Tajwar afterwards.

On the Membership side we have 4 new members induction up to this moment. We have also seen improvements in our members' attendance recently especially the effective use of make-ups such as in the revealed results of August as follows:

Team 1	60%	with 3 make-ups & 3 members with 100% attendance
Team 2	32%	
Team 3	67%	with 3 make-ups & 3 members with 100% attendance
Team 4	50%	
Team 5	25%	
Team 6	83%	with 5 make-ups & 3 members with 100% attendance.

You can see from the above attendance results about the importance of make-ups for our attendance record and the 100%-attendance members also played an important role. Members were urged to make more use of the makeup mechanism which we have made it very easy via the web-service media already.

All members were encouraged to join the new membership drive for getting five more new members by the end of this Rotary year and start bringing friends to our meeting to know our Club and the spirits of Rotary.

We put our hands together to thank PE Nancy's presentation and the efforts of Persons-in-charge and the respective contributing members under the leadership of our Pres. Eric in making all the service projects, membership and fellowship drives successful in the past few months.

Finally, President Eric has exchanged club flag with PP Martin Putz from RC Bad-Bergfabern, Germany, furthermore, PP Martin has given us a quick but informative presentation about their club and welcomed us to join their meeting anytime when we would be in Germany.

For next week's program, there is no meeting on Oct 5 due to public holiday of the Chung Yeung festival, so the next luncheon will be 12th Oct and we have invited our fellow Rotarian Jonah Cheung for his Vocational Talk.

At 2:05pm, Pres. Eric declared the closure of the meeting with a toast to RI, RC Bad-Bergfabern, Germany and Hong Kong Island East and he also invited all members and guests to stay back to take a group photo.

Rotary Potpourri

WEEE Go Green Visit - Members Learnt the New Applications in 3 "R"

President Eric, Christine, Ivan (son of Pres Eric), PE Nancy, IPP Heman, AG Andy, PP uncle John, Rtn Jonah, MC William, Fanny, Roy (William's younger son) Anderson (William's Grandson), Dr. James Luk and his 2 years old daughter (William's guest), totally 14 members and guests in THREE generations spent the morning on 24th Sept 2011 Saturday to visit ECO PARK in Tuen Mun and located the new definition of the "ICE HOUSE ST 雪廠街" and "SAI YEE St 洗衣街" there.

14 of us met together in a comfortable soft grass parking place before moving to WEEE GO CENTRE. Before visiting the center, we had a ceremony of donation the 17 non-usable and out of order electrical appliances, by President Eric to the centre manager Ms. Wendy Cheung, which were carried by the members and guests.

Firstly, we walked and located the "Ice House St" with many refrigerators and "Sai Yee St" with many washing machines respectively which were repaired in good order and under safe testing before delivering to the grass root and needy families.

Then we visited the workshop to see the skillful workers who shown how to break and handle the parts which were disassembled from various appliances. In the end of the touring, we visited the showroom where displayed various products and sculptures which were made from the parts of out of order appliances and computer components to show the reuse of the waste. Lastly, Pres Eric presented the club banner to the centre manager Wendy for memory. We also received the receipt from the centre on all the donated appliances.

After the WEEE GO CENTRE, we moved to the visitor's centre of Eco Park. After the detailed and fruitful introduction from the staff, we got more information and knowledge to support the three "R", "Reduction", "Reuse" and "Recycle", of the wastes.

We left the Eco Park at 1.00 pm. All participants said that this visit was really interesting and meaningful. To encourage members' participation, President Eric suggested that we should promote the awareness for recycling concept to all members and invited all members to bring a damaged or non-useable small appliance in the coming weekly luncheon meeting on Oct 12, 2011. Then we shall collect and send them back to the collection center of St. James Settlement to extend the educational value of this eco-project for those members who have not visited the WEEE Go Center in person.

Inspired by this visit, Membership Chair William initiated the promotion of collection of non-usable appliance in his residential estates to support the concept of eco-protection of recycling. It was a great example of the Rotarian in action. Well Done William!

We would like to express appreciation for the PIC membership Chair William Wong who arranged this visit before the commencement of service project with WEEE Go Center in Dec 2011. Thanks for the sponsorship from PP Uncle John who will sponsor the service project of delivery of these repaired appliance to the deprived family and elderly singleton in December, 2011.

RI Protocol Amendments to the Rotary Code of Policies for your reference

Please be informed that RI confirmed the APPENDIX D of the MINUTES OF THE MAY 2011 BOARD OF DIRECTORS MEETING with RI PROTOCOL AMENDMENTS TO THE ROTARY CODE OF POLICIES.

Significant amendments including changing the order of protocol from "Present - Past - Future" to "Present - Future - Past"; that is, we should address our DGE, DGN in front of PDGs.

Please follow the new RI Protocol accordingly when organizing your next Rotary event or activities.

Vocational Visit to Greenkey Technology Centre, to learning the re-use of dirty lubricating oils in use for continuous use. A new technology developed by PP Tajwar

A party of 11 members and spouse consisted of Pres. Eric and spouse Christine, PP Desmond, PP Norman, Rtn Kenny Chan, Rtn Peter Yeung, PE Nancy, Rtn John Yao and spouse Irene, Rtn William Wong and spouse Fanny visited PP Tajwar's work-shop, Greenkey Technology Centre in ShenZhen on Sept 23, 2011. Greenkey has spent over 20 years in Research and Development in exploring how the lubricating oil can be re-used. Our visit was to understand and learn the Research and Development journey adventured by PP Tajwar for the past 20 years.

The party gathered at Lok Ma Chau station at 2 pm. After crossing the border, they were received by the driver sent by PP Tajwar to his work-shop. After 1 hour traveling, we arrived at the Greenkey Technology Centre PP Tajwar waited at the entrance and gave us a big warm welcome.

The Centre is designed with a big work shop, a well cared big green garden and a european style wooden house which is the office of PP Tajwar. A coffee chat was held in this classic and well furnished private office in the european house with PP Tajwar. He told us the story of how he started the journey of research and development in this technology and how he finally got the patent from US Patent Authority for his technical knowhow.

Then he took us around his work-shop where he explained the history of how he set up this Greenkey Centre.

Lubricating oil never loses its lubricating properties during use, it does become contaminated and considered unfit for further use, and is disposed of as waste oil. However, if all the harmful contaminants and impurities are removed, and the oil restored to the required specification, then lubricating oil can be reused on a continuous basis. Repeatedly! This requires the removal of water, fuels, solvents, gases, oxidised and other solid particles. The laundered oil is then tested for viscosity, flash point, pour point, **TBN**, **TAN**, thermal stability, dielectric strength, and other desired specifications. Any additives lost while in use are replenished.

Greenkey Technology has met the challenge, and succeeded in this 'mission impossible' through over 20 years of research and development.

PP Tarwar further elaborated the process of his US Patented Technology.

- Greenkey Technology is the world's first on-site laundering and restoration process that reclaims market or custom-blend lubricating oils for continuous usage.
- Greenkey Technology is a fully-integrated chemical and mechanical process designed on a batch or modular system ranging in capacity from 800 to 8,000 litres per time.
- Greenkey Technology greatly improves and enhances the quality of oil in use, thus making it suitable for further and continuous use.

- Greenkey Technology does not harm or destroy the active additives still remaining in lubricating oil in use. Any additive components that are depleted in the used oil can be replenished to match the additive specification of the original oil.
- Greenkey Technology is offered to consumers of hydraulic, transformer, gear, machine, crankcase, locomotive, and all other types of lubricating oils, provided that they are strictly segregated.

Regarding the economics of applying the technology, PP Tajwar pointed out the following benefits:

- Greenkey Technology offers an on-site laundering and restoration of lube oils for re-use. There is no capital cost to the consumer. The service is offered through its agents on a fee basis only at a price considerably lower than the cost of replacing the used oil with new oil.
- Laundered and restored lubricating oils are not harmed or diminished in quality or function after processing by Greenkey Technology. The restored lubricating oil retains the same basic quality as new oil.
- The laundering and restoration process by Greenkey Technology can be repeated continuously, hence minimizing the cost of purchasing replacement new oil.
- Greenkey Technology recovers 95-97 percent of the volume of oil in use depending on the amount of contaminants that have been allowed to settle.
- Mineral oils are a non-renewable resource. Oil supplies are diminishing and the cost of oil is increasing dramatically. Greenkey Technology provides a viable and immediate cost-effective alternative.

To understand the Greenkey technology as 100% Environmentally Friendly, PP Tajwar showed us the flow chart as follows:

Flow Chart:

Entirely processed at below 85°C.

Members all were excited to listen to PP Tajwar explanation. They also climb the Precipitation vessel and holding vessel.

PP Tajwar summarized that his company had done The research & development, trails & tribulation and how a new technology and industry to handle used lubrication oils. It is the first of it's type in the world took place in Longhua, Shenzhen over a period of some twenty years.

He further added that the company was not being sold! The exclusive marketing rights for China is sold, and the (Work-Shop) with land sold to a real estate developer who plans to build 400 flats on this site.

The Research & Development phase, equipment design and manufacturing facilities having been completed, it is time to move the 'Greenkey Centre' to another location, about 10 minutes drive closer to Shenzhen for the sole purpose of manufacturing of Greenkey equipment for local and export sales and also for demonstration purposes.

Greenkey operations will move to Australia/Canada for world-wide marketing of technology on agency basis while the equipment manufacturing to continue in China.

After the visit, PP Tajwar invited all of us to have a buffet dinner in a deluxe hotel. On behalf of the group, President Eric expressed our appreciation for PP Tajwar's great hospitality and admired the persistence and determination of PP Tajwar in the research and development of the Greenkey Technoogy. Afterwards, PP Tajwar arranged transportation for the party back to Lo Ma Chau control point.

PP Tajwar said, "Having completed my mission, I will slow down, slightly step aside, and let a team of marketing experts take over the running of the business, while I hope to play more golf and attend more Rotary meetings!" Salute to your inventive spirit and entrepreneur journey !

JOKE FOR THE WEEK

Subject: Public Opinions

The Pastor entered his donkey in a race and it won, The Pastor was so pleased with the donkey that he entered it in the race again and it won again.

The local paper read:

PASTOR'S ASS OUT FRONT.

The Bishop was so upset with this kind of publicity that he ordered the Pastor not to enter the donkey in another race.

The next day the local paper headline read:

BISHOP SCRATCHES PASTOR'S ASS.

This was too much for the Bishop so he ordered the Pastor to get rid of the donkey.

The Pastor decided to give it to a Nun in a nearby convent.

The local paper, hearing of the news, posted the following headline the next day:

NUN HAS BEST ASS IN TOWN.

The Bishop fainted.

He informed the Nun that she would have to get rid of the donkey so she sold it to a farmer for \$10.

The next day the paper read:

NUN SELLS ASS FOR \$10...

This was too much for the Bishop so he ordered the Nun to buy back the donkey and lead it to the plains where it could run wild.

The next day the headlines read:

NUN ANNOUNCES HER ASS IS WILD AND FREE.

The Bishop was buried the next day.

The moral of the story is . . .

being concerned about public opinion can bring you much grief and misery . . even shorten your life.

So be yourself and enjoy life.

Stop worrying about everyone else's ass and you'll be a lot happier and live longer!
